

TOP RYDE SHOPPING CENTRE

Top Ryde Shopping Centre Redevelopment will be a 130,000m² mixed use development which will be spread over nine floors comprising retail, community, entertainment, commercial and residential uses.

Stage 1 of the redevelopment is valued at over \$440 million and will consist of a 78,000m² shopping centre and entertainment precinct which is planned for completion in 2010.

Top Ryde includes about 1600 Tonnes of post-tensioning, for all the suspended floors. About 40% of the post-tensioning works are complete at the end of March 2009. During March, Structural Systems installed, stressed and grouted 120 Tonnes of post-tensioning on this project alone.

This project was awarded to Structural Systems by Bovis Lend Lease as part of the ongoing Strategic Procurement Alliance between our companies.
